## Fritz Box Hack

The HTTP protocol sends data in clear-text, which equals: no need for decryption. (Redirected from FRITZ!Box/Fritz!Box brand logo)Additionally, since there is a HTTP management interface, setup a sniffer and wait for an admin to login and capture the data that is sent. You should perform an activity to 'motivate' the admin to log onto the Fritz box. Then you can get the credential set Fritz!Box 7050 WLAN
